You can now experience the thrill of high-performance sailing – not only on the race course, but also on family holidays or day-sailing trips. We have made this possible through a carefully placed high-tech and meticulously designed deck and interior ergonomics, which is bringing the most important features of grand prix racing boats into the hands of a club racer or active cruiser.

First 36 is the first mainstream racer/cruiser where onboard comfort doesn't affect the experience of high performance sailing.

A whole new sailing experience opens up when you can achieve double-digit boat speeds easily and in complete control. The main components of making this possible are the light weight and the world-class nautical design of Sam Manuard. An ergonomic and extremely precise steering system is also vital. With race-grade rudder blades, the steering wheels remain light and direct even when planing downwind or at higher heeling angles.

To stay true to its 40 years of Beneteau heritage, a First needs to excel in fully-crewed club racing, relaxed family cruising as well as shorthanded sailing. Cockpit ergonomics was one of the main focuses in the design process. The higher wheel position gives the helmsman direct access to the mainsail winch, an important detail for shorthanded sailing.
