Sold Beneteau Sailboats January-February 2019

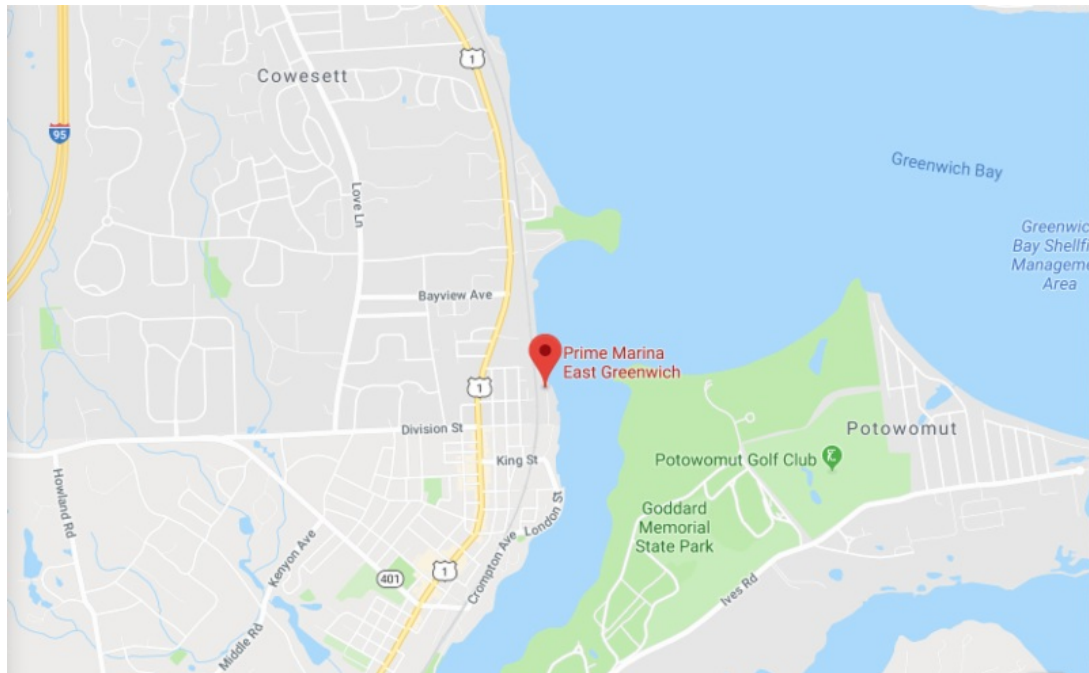

Data From Boating Intelligence Suite

This graph represents sold Beneteau Sailboats in the U. S. in 2019. So far this year tells us that "sales to date" look strong and we are expecting a robust 2019. Of course, we will monitor sales during the upcoming months and keep you informed. With the lack of "good" inventory your boat may be worth more now than in recent

memory. The decrease in production from 2008-2012 caused by the global economic turndown, and a few healthy hurricanes has created a lack of good late model Beneteau Sailboats on the market. Let us give you an honest and realistic estimate of your boats worth in today's market.
